PROJECTS

AI Web Interaction Using Voice Agent in KRISHI-SHETRA

- Developed an AI-powered voice-based marketplace that enables users to create and manage product listings through voice commands.
- Used Java and Spring Boot for backend processing and Spring Data MongoDB with MongoDB Atlas for data storage.
- Integrated Vapi AI for voice interaction and used Next.js, React, and TypeScript for the application interface.

Key Technologies: Java, Spring Boot, Spring Data MongoDB, MongoDB Atlas, Vapi AI, Next.js, React, TypeScript

CNG Reservation System

- Developed a web-based Smart CNG Reservation System to reduce waiting time and congestion at CNG stations by enabling users to check slot availability and reserve CNG refueling slots online.
- Implemented secure user registration and login, station and slot management, reservation booking, booking history, and cancellation features.
- Developed separate User, CNG Seller, and Admin modules for managing stations, slots, users, and reservations, with booking information securely stored in a MySQL database.

Key Technologies: Java, JSP, Servlets, MySQL, HTML, CSS, JavaScript, Apache Tomcat, Eclipse
